

Early diagnosis in neuro-oncology

By Aldo Fortuna

Berlin Heidelberg Milano, 2002. Pp. Book Condition: Neu. Gebraucht - Sehr gut verlagsfrische Restauflage, minimale Lagerspuren, ungelesen, sehr guter Zustand - It is common knowledge that a clinical diagnosis is based on a combination of symptoms and signs, observed in their evolution. Advancing the diagnosis at an early stage and particularly in the neurosurgical clinical examination would enhance the slightest possibility of recovery, theoretically almost transforming it into a concrete possibility. This book has a precise goal: to examine the 'germ' of diagnostic suspicion, which is the true salt of medical art for every physician, general practitioner and specialist alike. In some cases also the characteristics of the late clinical picture are presented: today, though, this must be considered as a medical failure. 0 pp. Englisch.

Reviews

This book is definitely worth acquiring. I have go through and so i am certain that i will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after i finished reading this publication in which actually altered me, change the way in my opinion.
