Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Birth of Worlds and Systems I Have been asked to write a few words of introduction to this volume by my former teacher, A. W. Bickerton, for many years Professor of Physics and Chemistry in Canterbury College, University of New Zealand. I do so from the personal rather than the scientific standpoint, for I can lay no claim to be regarded in any way as an authority on astronomical matters, although, I trust, I take that intelligent interest in the subject which is possible for one who is a specialist in another branch of science. More than thirty years ago Professor Bickerton published in the New Zealand Philosophical Institute a theory to account for the origin and life history of new stars. These stars suddenly appear in the heavens, increase in brilliancy for some time, and then in the course of a few months or years disappear from view. It is now thought by many that the birth of new stars must be due to some kind of impact between two celestial bodies. This point of view was taken thirty years ago by Professor Bickerton.
