

Few-Body Problems in Physics 98

Filesize: 1.19 MB

Reviews

It is one of the best books. Indeed, it really is a play, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Sofia Yundt)

FEW-BODY PROBLEMS IN PHYSICS 98

Book Condition: New. Publisher/Verlag: Springer, Wien | Proceedings of the 16th European Conference on Few-Body Problems in Physics, Autrans, France, June 1-6, 1998 | The sixteenth European Conference on Few Body Problems in Physics has taken place from June 1 to June 6, 1998, in Autrans, a little village in the mountains, close to Grenoble. The Conference follows those organized in Peniscola (1995), Amsterdam (1993), Elba (1991), Uzhgorod (1990) . The present one has been organized by a group of physicists working in different fields at the University Joseph Fourier of Grenoble who find in this occasion a good opportunity to join their efforts. The core of the organizing committee was nevertheless located at the Institut des Sciences Nucleaires, whose physicists, especially in the group of theoretical physics, have a long tradition in the domain. The Few Body Conference has a natural tendency to be a theoretical one - the exchange about the methods used in different fields is the common point to most participants. It also has a tendency to be a hadronic physics one - the corresponding physics community, perhaps due to the existence of experimental facilities devoted to the study of few body systems, is better organized. In preparing the scientific program, we largely relied on the advices of the International Advisory Committee, while avoiding to follow these trends too closely. | Resolution methods for few-body problems.- Quantum Monte Carlo Methods in Few-Body Physics.- Recent applications of the stochastic variational method.- Adiabatic hyperspherical expansion and three-body halos.- Correlated hyperspherical harmonic methods and applications.- Low-energy scattering in four nucleon systems. Method of cluster reduction.- An investigation of four body bound states.- Extension of the Faddeev equation to nuclei.- Adiabaticity in Faddeev equations.- Jastrow-correlated configuration-interaction description of light nuclei.- Uniform description of the bound, quasistationary and scattering...
