Failed as a long column under a pressure of 5,400 lb. per square inch. Crushed under a load of 2,420 lb. per square inch. Fig. 288 is a diagram of deformation showing the behaviour of the six prisms. The figures against each line are the proportion of the volume of reinforcement to the total volume of the prism, being in the first figure for the longitudinals and in the second for the spirals. Group No. 6 approaches closely the manner of reinforcement usually adopted at the present time. General Properties of Ordinary Reinforced and Hooped Compression Members.--The following phenomena were observed during the above experiments, but no special instruments were used for measurements. Group No. 1 broke suddenly without warning, and the failure of Group No. 6 was almost as sudden, the breaking load for the latter only exceeding that producing the first...
