

## Popular Astronomy Volume 1-2

By Carleton College Observatory

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: .use of his opportunities. Visitors to the Russian exhibit at the World s Fair will recall the beautiful photographs contributed by Professor Glasenapp of the picturesque Mountain Observatory at Abastuman. s. w. B. Double Star Measures Near H 3950.--The faint pair of stars, near H 3950, referred to by Mr. Sprague in the May number of Astronomy and AstroPhysics, (p417) was first noted in the low-power sweeps at Madison (Pub. Washburn Observatory Vol. II), and subsequently measured by Comstock in his review of those stars (Vol. VI). It is much too wide in distance and too faint in magnitudes to be of any interest as a real double star. s. w. B. Small Telescope with Spectroscope.--In a note on Observations of Svin-spot Spectra published in the February, 1892, number of Astronomy and Astro-Physics, the attention of amateurs was called to the valuable contributions which they can make to...

### Reviews

*This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Ally Reichel**

*This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).*

-- **Prof. Kirk Cruickshank DDS**
